Subject: Web Site?

Hi Joe,

I just tried to access your website but it no longer seems to be available. did you have to shut it down or is there a problem?

I've been meening to contact you and let you know I lost my mother on Sept 24, 2009. She fell in august and broke her leg (just below the hip) She appeared to be doing Ok at first but suffered a mild heart attack when she started rehab. A week later she had a more severe heart attack and wasn't stong enough to recover. I miss her alot, although 88 yrs old she was very active for her age and it was so unexpected.

I hope you still plan to keep the web site. My cousin mentioned finding his mother's picture there in sept.

Here's wishing you a safe and Merry Christmas!

Your cuz,
Phil
